Accelerating **Growth** Stories

For industries to constantly evolve and transform, it is essential that the challenge of resource scarcity is carefully addressed. At Protecti Global Holdings, we aim to catalyze the growth trajectory of businesses with our technological expertise and sustainable practices that will not only make headway for unlimited possibilities but also assist multiple industries overcome the unprecedented challenges of the future.

Building A **Legacy**

6+ Years of Experience

7+ Countries and Counting

7+ Areas of Businesses

10,00,000+ Happy Clients

Delivering Impactful **Solutions**

As a global holding company, we strive to become a dynamic powerhouse. Our diverse businesses are spread across multiple sectors including bio-technology, manufacturing, natural resources, energy, agriculture, and real estate.

Our strong foundation seeds from years of experience, and our impeccable reputation has been built by consistently delivering exceptional results that are driven by technology and innovation.

Our Lines of **Businesses**

Bio-tech

Offering an integrated and seamless global healthcare experience

Energy

Optimizing the efficiency of natural resources and revolutionizing the way they are consumed

Seismic Surveys

Investigating the depths of the earth, for insights about what lies beneath

Manufacturing

Creating high-precision parts that impacts the design of an aircraft and its performance

Natural Resources

Building new opportunities for growth and diversification, while exploring mining as a significant potential for expansion

Real Estate & Infrastructure

Specializing in real estate infrastructure and interior design, we offer high-quality services and top-notch solutions for various projects

Agro Industry

From producing, to processing, and distributing, we play a pivotal role in ensuring food security, safety, and quality

Our Subsidiaries

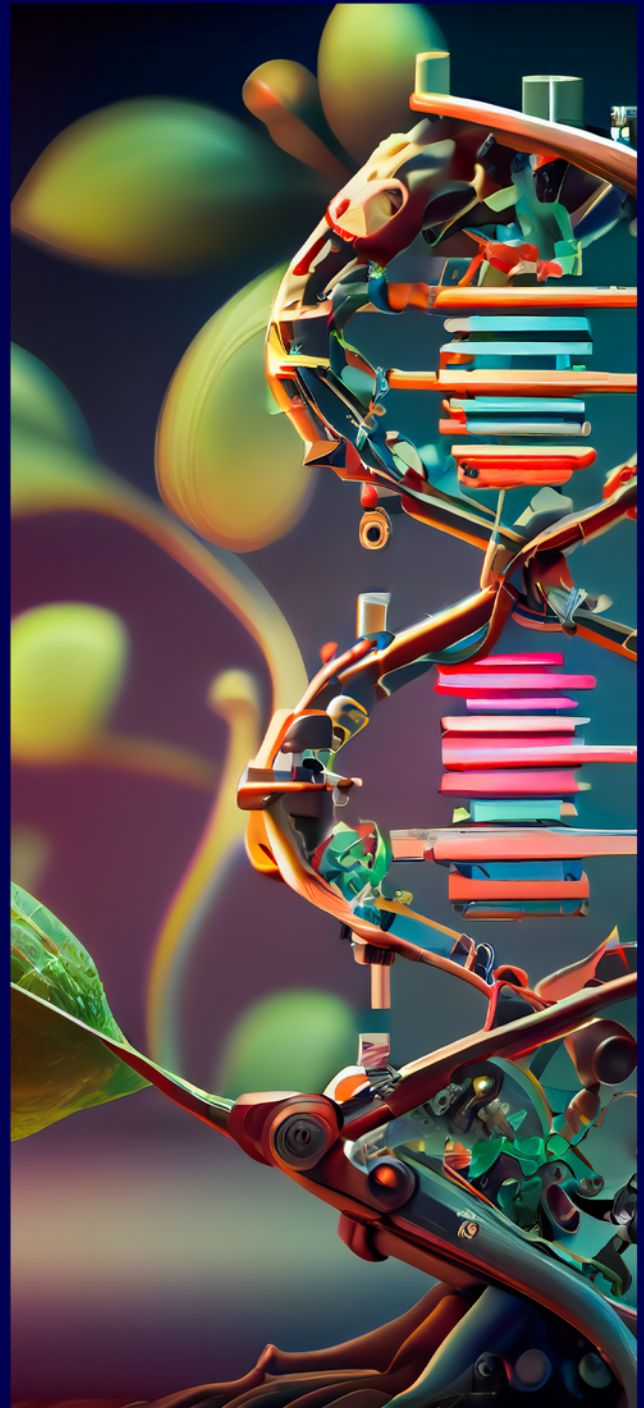

Bio-Technology

Offering an integrated and seamless global healthcare experience

The healthcare industry owes a part of its transformational journey to the innovative approaches of biotechnology. Bio-tech came in as a powerful force and introduced cutting-edge technology that spearheaded the revolution in the field of medicine.

Protecti Global Holdings Ltd envisioned biotechnology as the lifeline, one that has tremendous and unlimited potential for human life. We realized that the industry is making advances that were previously only imaginable, presents exciting opportunities for the medico-socio economic segment. Protecti Biotech in India and Russia is evolving as a modern global biotechnology enterprise with a biopharma focus, engaged in research, development, manufacturing and marketing of advanced biological medicines, including Vaccines, Antisera, Biosimilars and progressively Biobetters, Biosuperiors and Novel Biologics.

The company envisions protecting and nurturing human health and well-being as a socially connected enterprise across the globe and help address the world's resource scarcity, including food and fuel, challenges like climate change and pandemics, clean water shortages, ageing populations and cancers, among others through every sphere of modern biotechnology.

Our Subsidiaries

Energy

Optimizing energy efficiency and revolutionizing the way it is consumed

Protecti understands that the global energy needs must be met responsibly, and is attempting to take energy efficiency steps that will mitigate the risks associated with environmental sustainability and climate change.

We are making constant advancements in energy storage technologies that play a crucial role in creating a balanced energy supply and demand chain thereby optimizing energy consumption. By taking these necessary steps, Protecti Global Holdings aims to ensure a brighter energy future for our future generations.

Seismic Surveys

Unveiling the power of what lies subsurface

Protecti Global Holdings has employed high-grade technologies to provide seismic surveys to diverse industries. By investigating the depths of the earth, we enable geologists and scientists to unlock deeper insights about what lies beneath in terms of structure and composition. Our innovative survey process helps generate and record seismic waves, that help provide crucial information regarding the exploration of resources, help assess geo-technical scenarios, and mitigate any possible hazards.

Through this service, Protecti Global Holdings aims to gain a better understanding of the planet's dynamic parameters to ultimately facilitate better decision-making in the various industries that we serve.

Our **Subsidiaries**

Manufacturing

Innovative technology that significantly contributes to the advancement of the aerospace industry

Protecti Global Holdings was quick to adapt the modern 3D Printing technology, and employs this innovative technique into creating intricate components by the layering of metals or composites that are derived from models created using digital designs. There are a plethora of advantages to aircraft parts created using 3D manufacturing which include the following:

Reduced lead timing | Better design flexibility | Enhanced weight efficiency

Through the application of this technology, Protecti Global Holdings aims to contribute to the aerospace industry by fuelling the development process, helping maintain cost-effectiveness and ultimately manufacturing highly efficient and dependable aircraft structures.

Natural Resources

Creating opportunities for growth, while exploring mining as a potential for expansion

Protecti Global Holdings is particularly involved in the seismic scanning process when it comes to contributing to the growth of the natural resources industry. The information gathered using this technique assists mining businesses to accurately locate and analyze valuable natural resources like minerals, oil, and gas. The seismic data collected by us is further analyzed by mining engineers, and geologists, which allows them to gain deeper insight into the many components of the resources.

Our **Subsidiaries**

Real-Estate & Infrastructure

High-quality services and top-notch solutions

Protecti Global Holdings also specializes in real-estate infrastructure and interior designing by providing a consolidated range of solutions and services that meet the diverse needs of different real estate projects. Our expertise lies in providing clients with efficient and sustainable solutions that seamlessly blend with their surroundings. We have a proficient team of experts who collaborate with industry professionals to create aesthetically appealing structures which are functional, durable, and in total compliance with real estate industry standards.

Agro Industry

Ensuring food safety, and quality

Protecti strives to be deeply involved by assuming a crucial position at every stage of the process; starting from the production, to the processing, and the distribution. We work closely with industry experts and provide them with the required resources, knowledge, and technology, which can help optimize agricultural practices. Additionally, we also have stringent quality control measures in place to ensure that the food products meet all necessary standards of safety and hygiene.

Our Footprint

Helping Industries Pave The Path To Progress

A swiftly changing global landscape like ours, calls for the need of measures that will ensure consistent growth while securing a sustainable future. Protecti Global Holdings strives to spearhead this transformative shift amongst industries worldwide. What we are trying to achieve by employing innovative technologies is economic progress in accordance with environmental sustainability.

In order to attain this objective, Protecti Global Holdings narrows down its key focus areas to the following:

- Adopting clean technologies
- Renewable sources of energy
- Optimizing resource utilization to minimize environmental impact
- Promoting energy efficiency to ensure steady economic growth

Along with implementing responsible supply chain practices, we would ensure sustainable sourcing of raw material, resource management, and accountability throughout the value chain.
